This pdf contains a HU poker hands chart for the most common situations that you will face in game when playing 100bb deep.

Learning these Heads Up poker ranges and implementing them at the table is an essential part of forming a winning strategy at short handed NLHE Cash game poker.
These are GTO ranges for 500z rake structure at PokerStars, which is 5% capped at 0.3bb. If you play in games with higher rake, check out the 200NLGG Poker HU ranges for 200NL, which were solved for games with 5% rake, capped at 1.5bb.

How to Use the Heads Up Preflop Range Charts

There are poker charts for the three most common types of preflop situation.

1. The Raise First In (RFI) Ranges show which hands to play from the small blind when you are first to act.
2. The Facing a Raise (vs RFI) Ranges show which hands to play from the big blind when the small blind raises first in.
3. Facing a 3bet (vs 3bet) Ranges show which hands to play from the small blind when you have raised first in and the big blind re-raises you (3bets).

These NLHE Heads Up preflop ranges are simplified versions of the strategy output by GTO poker solvers.
GTO strategy involves a lot of mixing, which means that a particular hand combo may be raised 18% and folded 72%.
Each poker hand chart has been simplified so that the frequency of an action for each hand combo is rounded to the nearest 50%. If you see a hand with a mix of colours, it means you should take one action half the time and the other action half the time. You can either use a randomizer (e.g. one action if high card first, other action if small card first) or base you action on your reads of your opponent, e.g. if they play too tight or too loose.
This makes it easier to learn a solid base strategy and implement in game, without losing too much accuracy.
